

Copeland Scroll™

ZBW/ZFW Variable Speed Integrated Solutions

For Refrigeration Applications

Copeland Scroll™ ZBW/ZFW variable speed integrated solutions

Emerson variable speed integrated solutions were developed for our partners with specific requirements for variable speed capacity modulated medium temperature and low temperature applications, such as convenient stores, supermarkets, process chilling and cold rooms.

The solution offering includes variable speed compressors, drives & controllers, as well as system components like EXVs, economizers, pressure transducers & temperature sensors tailored to the customer requirements.

With long term engineering and manufacturing experience in scroll compressors, combined with innovative variable speed technology, Emerson provides a total integrated solution with value in matched and tuned drives, CoreSense™ diagnostics and vapor injection technology for a variety of Cold Chain applications.

Features and benefits

Variable speed advantage

Modulated capacity
high efficiency at part load

Low noise
operation

Accurate temperature
control for food safety

Wide input range
minimizes grid impact

Emerson integrated solutions to meet customer needs

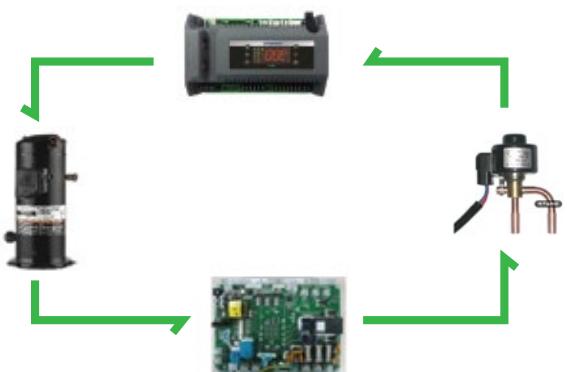

Customer pain points	Emerson solution
Need to coordinate with various compressor and electronics suppliers for system development	One-stop shop Capability to supply all core components in variable speed systems including compressors, drives, controllers, temperature sensors, valves etc.
Lack of adequate technical support	Dedicated integrated solutions team Expert Emerson engineering team provides specialized support for all refrigeration requirements
Long lead times for variable speed system development	Qualified solution with high reliability Fully integrated control logic, system protection and optimized parameters
Poor performance in low evaporating conditions	Refrigeration variable speed scroll ZBW for medium temperature applications ZFW for low temperature applications
Low efficiency at high pressure ratio conditions	Vapor injection technology Significantly improving efficiency, providing best in class lifecycle cost

Emerson integrated solutions team

Emerson is fully committed to developing innovative solutions for the HVACR industry and to help customers achieve their cold chain objectives. Emerson responds quickly to the market changes and listens attentively to the voice of customers. With Emerson, you can consider your cold chain challenges solved.

Our service offerings:

- Provides customers with full technical support services
- Coordinates with internal resources and Emerson laboratories to fully validate solutions
- Delivers safe and reliable product solutions for the market
- Continues to expand system simulations and system lab capabilities

Value for customers

Market-leading
system performance

Trusted Emerson brand
with decades of cold chain
solutions

Helping customers
respond quickly to
market demands

Higher unit reliability

On-site monitoring
continuously tracks
real-time performance

Emerson variable speed integrated solutions features

Drive

- Optimized for Copeland Scroll™ compressors with customized parameter settings
- Plug and play compressor compatibility
- Built-in compressor protection further enhances reliability

ZBW/ZFW Variable speed compressor

- Wide operating envelope
- Robust design for refrigeration
- Enhanced vapor injection
- Highly efficient scroll & BPM motor

CoreSense™ controller

- Compressor envelope control
- Premium control algorithm for annual base energy savings
- Monitors operating conditions
- Compressor / power-supply / system protection
- System self-diagnostics for prolonged system operation
- Communication & intelligent store solution
- Premium user interface with LED

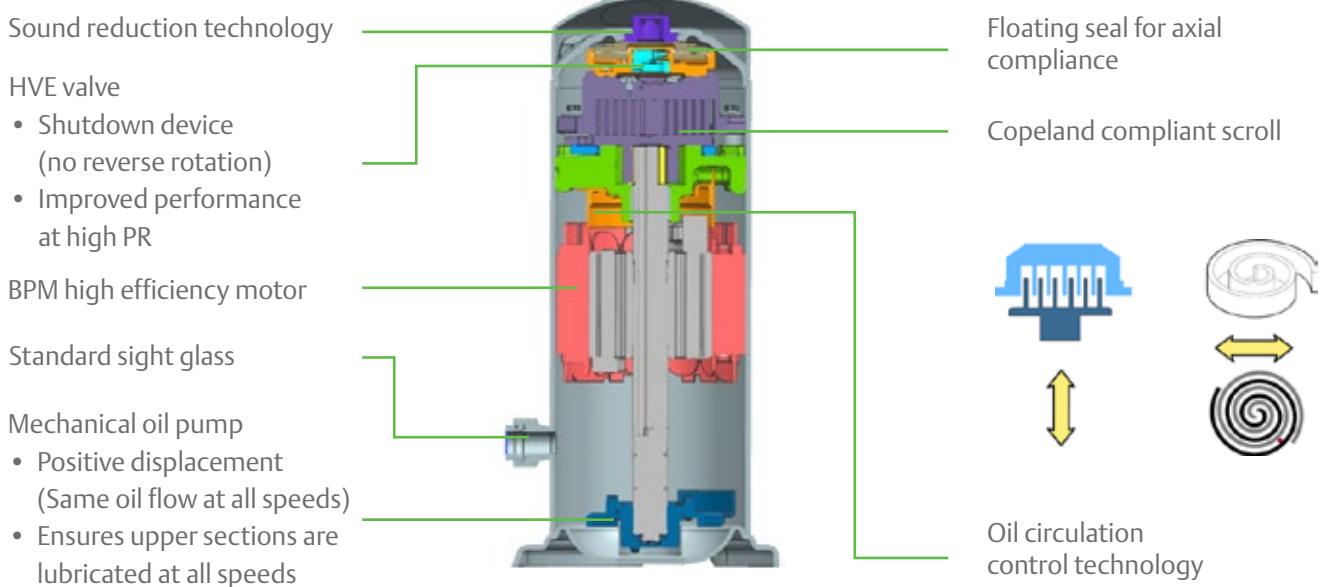

System components

- Accurate pressure and temperature control
- Qualified for high reliability
- Optimized selection per customized needs

ZBW/ZFW variable speed compressor key design features

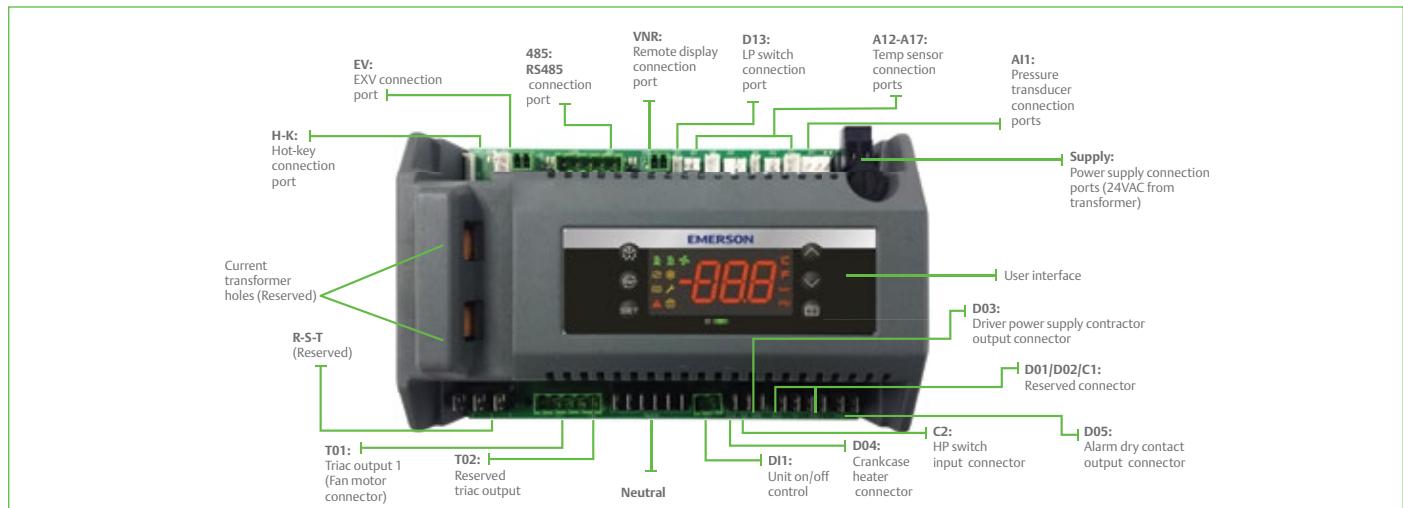

Drive

- Optimum combination of compressor and drive, delivering maximum efficiency
- Best in class built-in protection & control for reliable operation

Bundled solutions list

The variable speed integrated solution is intended to provide a turnkey solution for condensing unit builders. The bundle includes a variable speed compressor, a matched drive and a CoreSense™ controller for condensing unit. The CoreSense controller provides the compressor envelope control, vapor injection control, condensing fan speed control and protection functions for the compressor and unit.
